Movie Metadata Generator: how it is put together

sketched from the files

Movie Metadata Generator: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Movie Metadata Generator is for

WHAT IT IS

A small project in Python, Markdown. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: movie-metadata.py, README.md, LICENSE.

WHAT COMES OUT

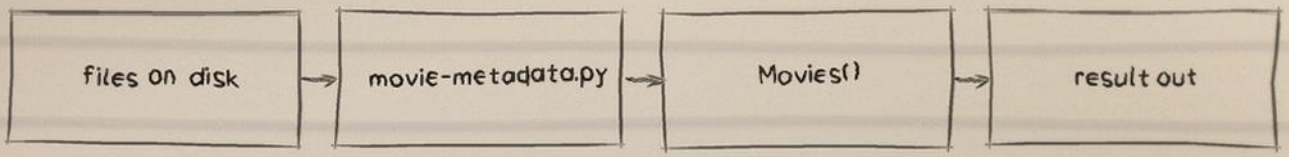

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Movie Metadata Generator: data flow, in one direction

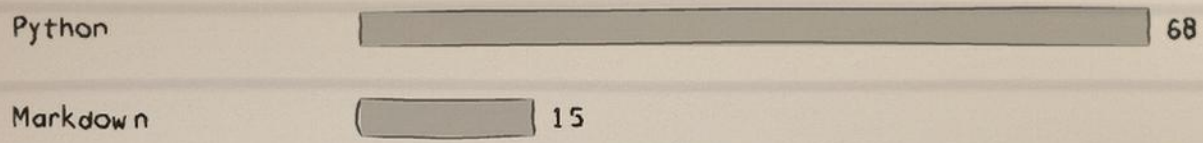

One direction. Anything the code does not do is not drawn.

second sheet, GK

Movie Metadata Generator in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.

3 commits, first 2024-09-03, last 2024-09-03, from the local git log.

No test files by name in this snapshot.

counted and drawn, GK

Movie Metadata Generator: schematic of the apparatus

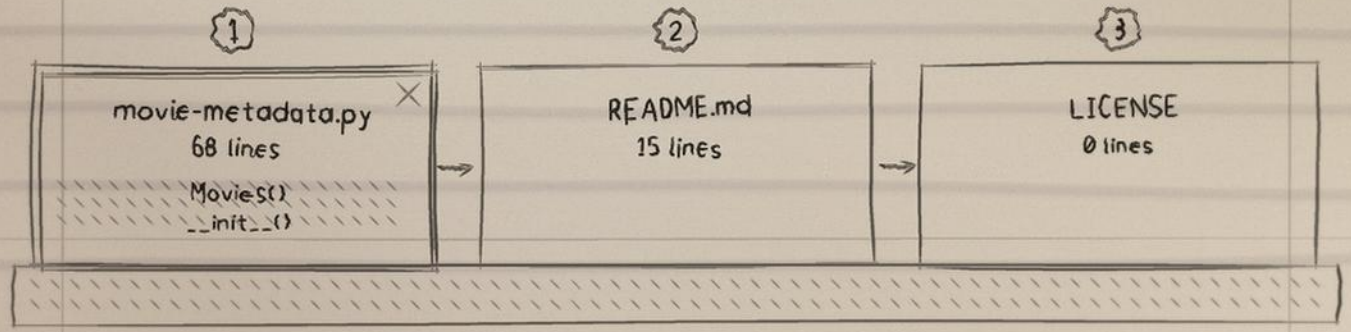

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. movie-metadata.py
2. README.md
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 83 lines counted

turns of the crank so far: 3 commits, 2024-09-03 to 2024-09-03

measured and sketched, GK
